6           GEVENE SAVALA: Good afternoon. My name is  
7    Gevene Savala and I'm from the Kaibab Paiute Tribe. My  
8    concern has to do with the transportation issue. The  
9    transporting of different types of high waste, nuclear  
10   waste that's going to be going through the roads here.  
11   We're blind to and are at a loss to understand what  
12   roads are to be used. This is very important to the  
13   tribes. We need this information to prepare for  
14   emergency purposes.

15           As you know, money is scarce at the Tribal  
16   level. We need this information quickly so our tribes  
17   can get the necessary training to face these  
18   emergencies.
